fulltime

SANCTUARY COMPUTER - NYC / Remote. 01/21- present; 09/18 - 02/20

Senior developer at top tier digital dev shop producing artfully crafted websites, innpvative mobile apps, and unique IoT projects. Worked on the LightPhone II OS & admin platforms, as well as frontends and apis for various apps in the ecommerce, fitness, and sustainability spaces.

GATHERLY - Remote. 12/2020 - 12/21.

Senior Developer working on spatial chat platform using React and AWS ecosystem. Supported events with 10k+ attendees, architected admin platform using Serverless framework, and created hiring process to build diverse team.

QUARTET HEALTH - New York, NY. 05/2016 - 02/18.

Helped craft the flagship product careteam.quartethealth.com from an MVP therapy referral tool to a fully-fledged collaborative care platform where doctors, patients, insurance representatives and therapists can communicate to deliver the best care possible. Promoted from Software Engineer I to Engineer II.

BIRCHBOX - New York, NY. 11/2015 - 02/16.

As a software engineer on the Subscriber Growth team, I worked closely with marketing on the CMS to deliver custom promotional pages and integrate stakeholder access to A/B testing tools. Departed amid substantial layoffs.

CISCO SYSTEMS, Talos Intel – Columbia, MD. 02/14 - 10/15.

Web designer + front-end developer, initially freelance but later full-time. I worked on a small team to create marketing sites for various anti-malware products, as well as external tools for community members to report potentially malicious files, and a Github-like internal tool allowing malware analysts to write rulesets collaboratively.

selected freelance

SOUTHARD REID (2020, ongoing) Web brutalist-inspired online fine art gallery, prioritizing elegant virtual exhibitions. Design by No Plans.
